JOHN WANAMAKER PHILADELPHIA

The Hupmobile. Car of the American Family. G. G. Brownlee Says: From what I know of motor car values in general and in particular, I don't hesitate to state my opinion that this Hup is the biggest and best value on the market this fall. Take size, for example. The Hup carries five passengers, without crowding or stinting. Its wheelbase is 119 inches—as long as many cars that cost more—and the body so designed that the passengers get all possible benefit of this generous length. Take equipment—a big feature nowadays. This car gives you a perfected electrical starting, lighting and ignition system, accessories of the highest quality, all for the convenience necessary to a complete car. As to quality, I need only say that it embodies every bit of the goodness that has made the Hup famous all over the world—its economy, its reliability, its continuous service, etc. If you follow my advice, you will see and ride in the Hup before you sign a check for a new car. Convert your touring car or roadster into a closed car for winter by fitting a Hup sedan or coupe top.
